

Public access laws apply to telephone calls made by the public to the Moore County 911 Center including 911 audio recordings.

If you have a need for an audio recording, you must complete the “ [Tape Request” form](#) that is available.

After filling out the form, fax it to Moore County Public Safety at (910)947-6378. The Communications Manager will review the request checking for any ongoing criminal investigation related to the incident and any information on the incident recording that may present a HIPAA violation. Information deemed to violate HIPAA laws will be removed from the audio transcript or blocked from the recording before it is released to the requestor.

The Communications Manager has 7 business days (excluding weekends and holidays) within which they can respond to the request. There is a \$3.00 charge for all CD's.
